

Mrs. Ruth Prebynski
K–8 Technology Teacher

Mrs. Ruth Prebynski teaches Technology for students in Kindergarten through 8th grade at FCA and is passionate about helping students understand how technology connects to both academics and everyday life.

Mrs. Prebynski holds a Bachelor of Science in Psychology with an emphasis in Christian Counseling from Liberty University and maintains ACSI Specialist Teacher Certification.

Mrs. Prebynski began her teaching career in 2024 and joined FCA in 2024. She enjoys helping students develop practical technology skills while building confidence and critical thinking. She especially loves celebrating those “aha” moments when students make meaningful connections between what they are learning in the Technology Lab and other areas of life and learning.

Faith is intentionally incorporated into Mrs. Prebynski’s classroom through conversations about wisdom, discernment, and the responsible use of technology. She encourages students to think critically and biblically about their digital choices and how technology can either strengthen or distract from their relationship with the Lord.

Outside the classroom, Mrs. Prebynski enjoys gardening and creating beautiful outdoor spaces. She also loves spending time with her family and making memories together at Walt Disney World.
